61 b

In cycle analysis, stocks will often move in the opposite direction of the cycle. This is called an inversion. When the next directional change of the cycle occurs, the stock is also likely to reverse its trend.

-- 09/14/17

YUP! Exactly what happened. Nice profit on the SepWk5 Puts

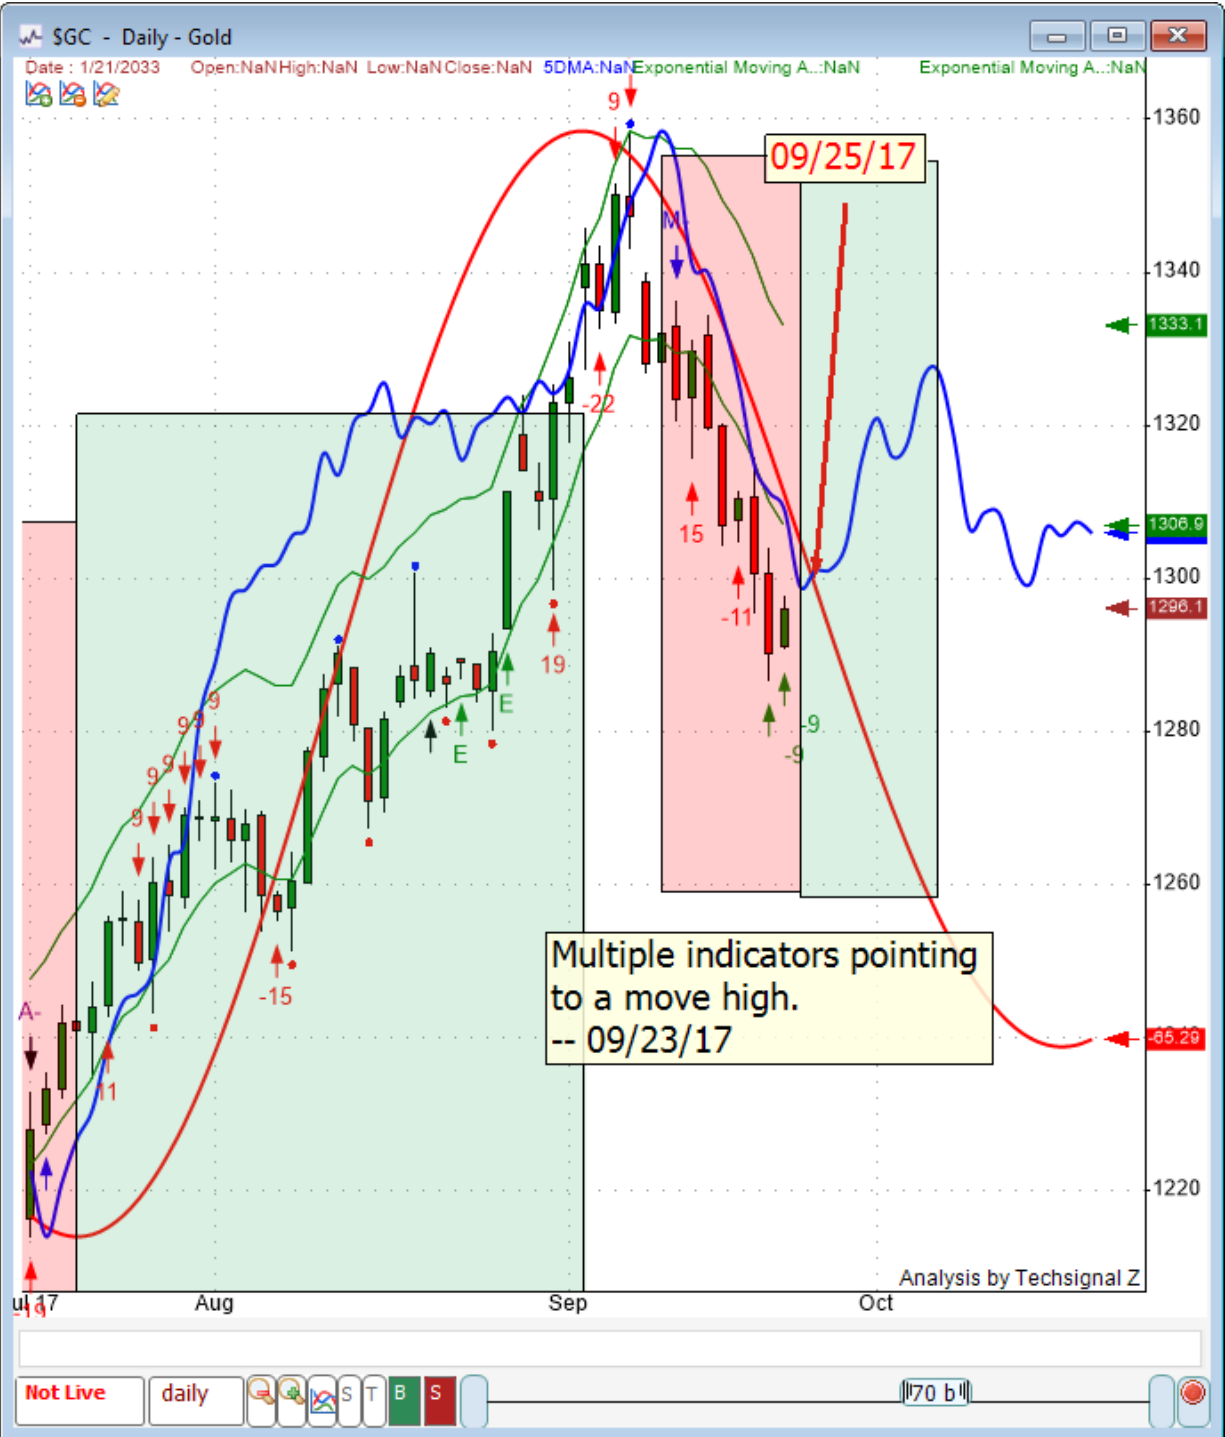

-- 09/23/17

Moving up as expect. We are Long.
-- 09/12/17

Watchout for the short-term red period this week.
-- 09/23/17

Analysis by Techsignal Z

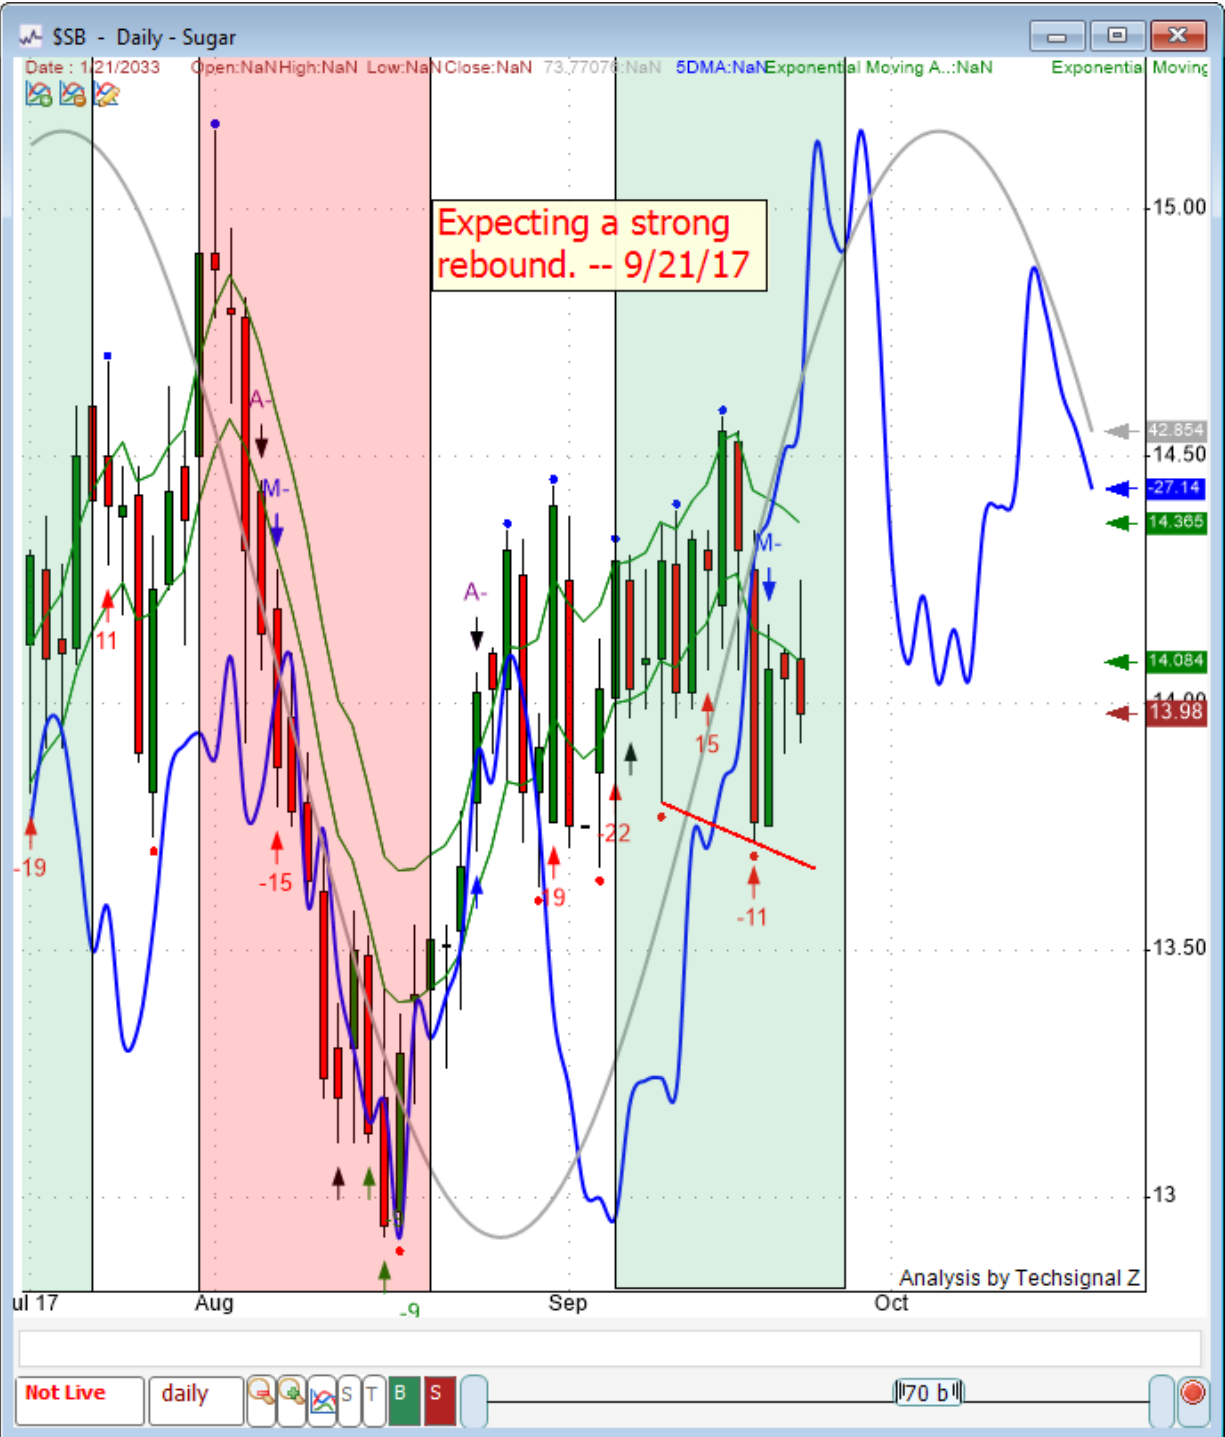

Multiple indicators pointing to a move high.
 -- 09/23/17

Analysis by Techsignal Z

Clearly entering a Bearish Period.
 Notice the swarm of 9's and the -22
 reversal indicator. The trend was up, so
 the -22 reversal should be down.
